Every DM, every WhatsApp, one place your team actually closes from.

You already have an Instagram concierge that has handled 123 real conversations in six days. This proposal extends the same care to WhatsApp and gives your whole team a single CRM, so no creator, brand or campaign enquiry is ever lost between apps.

Where Glad U Came stands today

97%	11 s	401	2,658
CONVERSATIONS HANDLED CLEANLY (WED 4 NOV)	MEDIAN REPLY TIME ON @GLADUCAMEPR	CUSTOMER MESSAGES READ IN SIX DAYS	PAST CHATS ALREADY IN ITS MEMORY

What we see in your inbox

Glad U Came does not get one kind of message. In six days the concierge sorted the inbox into very different people, and each needs a different answer:

Brands with a budget

Brand leads asking for campaigns, creators and reach. These are **the revenue**. They need a quick, confident reply, a budget range and a contact captured, then your team on the call.

Creators you invited

Creators answering your outreach, and creators pitching themselves. Many ask "is it paid or barter?", which is a conversation your team should **negotiate**, not lose in a busy inbox.

Everyone else

Vendors, promos, job seekers, auto-replies and people chasing for an update. The concierge already tells them apart so your team's time goes to **the right 20%**.

The problem we are solving next

Conversations are split across apps

A brand starts on Instagram, then says "let's continue on WhatsApp". From that moment the history, the budget they mentioned and the promise your team made live in two places, and the second one has no memory at all.

No single view of the pipeline

Today, to know "which brands are warm this week?", someone scrolls chats. There is no list of who is waiting on us, who went quiet, who asked for a call and who is ready to sign.

Our proposal in one line

Keep what already works on Instagram, bring the same agent to WhatsApp, and put both into one CRM that your team opens every morning to see exactly who to talk to first.

Source. Figures come from the Instagram Concierge Performance Record for 30 Oct to 4 Nov 2026, measured on the live @gladucamepr account.

Three pieces, one system

LIVE TODAY

1. Instagram concierge

- Replies to every DM on @gladucamepr in about 11 seconds, day and night
- Reads the full chat history first, and steps back when your team is already talking
- Sorts brand, creator, vendor and job seeker, then answers each the right way
- Never quotes fees or promises dates; hands those to your team
- Daily report of what it handled and what it flagged

NEW

2. WhatsApp concierge

- The same voice and the same rules, on a verified Glad U Came WhatsApp Business number
- Picks up the Instagram history, so a brand never repeats itself
- Instant answer to first messages, forms and click-to-WhatsApp enquiries
- Proper follow-up templates for creators who went quiet
- Your team can jump in at any time and the agent steps aside

NEW

3. Central CRM

- Every Instagram and WhatsApp conversation as one profile per brand or creator
- Stages from New to Warm, Call booked, Negotiating, Won and Not now
- Tags for brand, creator, paid and barter; budget and contact captured automatically
- Tasks and reminders so no one is left waiting
- One weekly view of the pipeline for you

What happens to a brand enquiry

1
DM arrives
A brand writes on Instagram at 11pm.

2
Replied in seconds
The concierge answers in your tone and asks one question: their budget range.

3
Profile created
The CRM records the brand, budget and number, tagged "hot".

4
Moves to WhatsApp
They switch apps. The agent already knows everything said so far.

5
Your team closes
Maddie's team sees a ready summary, calls, and moves the stage to Won.

Built around how Glad U Came works

YOUR REALITY	HOW THE SYSTEM HANDLES IT
Paid or barter	The CRM tags every creator as paid, barter or undecided, and the agent follows **your own rules** on pricing, barter and how far to negotiate, once your team shares them (questionnaire already sent).
Your team's voice	Replies are written in the warm, direct style of your own past answers, and checked by a second AI before they are sent.
Human first	When someone asks for a human, or your team has replied, the agent pauses on that chat. Nothing is ever said over your team.
Voice notes	Never answered by the bot. They are flagged in the CRM for your team to listen to and reply.
Nothing invented	No made-up fees, dates or phone numbers. If it does not know, it says your team will confirm, and creates a task.
Daily proof	A short daily report: chats handled, slips found, fixes made. The same honest format as the record we just shared.

WhatsApp note. WhatsApp requires a Meta-verified business number and pre-approved message templates for outbound messages. We handle the setup and the approvals.

How we roll it out

WHEN	WHAT HAPPENS	WHAT WE NEED FROM YOU
Week 1	Pricing and barter rules loaded into the Instagram agent. CRM structure set up around your stages and tags. Existing 2,658 chats imported as the first profiles.	Answers to the pricing and barter questionnaire
Weeks 2 to 3	WhatsApp Business number verified, templates approved by Meta, WhatsApp agent tested in draft mode on real past chats.	Access to the Glad U Came WhatsApp Business account
Week 4	WhatsApp goes live. Instagram and WhatsApp conversations merge into one profile. Team walkthrough of the CRM.	Your team joins one 30-minute walkthrough
Every month	Daily reports, a monthly review with you, fixes and improvements shipped within the same week they are found.	A short monthly call

Our commitments

Accuracy

Higher than today's **97%** clean handling within one week of working with your pricing and barter rules, with the same daily report.

Transparency

You see what the agent said, what it held back, and what it handed to your team. **Nothing hidden**, including our own mistakes.

Your data

All conversations and creator details stay in your CRM and remain **yours**. Aperture does not use them for anyone else.

Monthly investment

- **Instagram concierge** on @gladucamepr, kept live, monitored and improved
- **WhatsApp concierge** on your verified business number
- **Central CRM** with stages, tags, tasks and a weekly pipeline view
- **Setup, template approvals and team walkthrough** included
- **Daily performance report** and a monthly review call

PER MONTH

₹29,999 / month

All three pieces, one price.
Meta's own per-conversation WhatsApp charges are billed at actuals by Meta.

> *"We deliver what we promise." We would like to hold ourselves to the same line: a system your team trusts enough to forget about, and a report that proves why.*
>
> APERTURE, WITH GLAD U CAME

Next step

Say yes, share the pricing and barter answers, and we begin Week 1 the same day. The Instagram concierge keeps running exactly as it is while we build the rest.

Terms in brief. Billed monthly, cancel with 30 days' notice. Prices in Indian rupees, excluding GST. Rollout dates assume timely WhatsApp account access and Meta approvals, which are outside our control.
